

PALANTIR FOUNDRY · AIP · AZURE · DATABRICKS · SNOWFLAKE

Your Palantir pilot worked. Now scale it.

PROVEN AT SCALE

60+

Hospitals on Palantir Foundry — active deployment

5

Healthcare use cases delivered in production

100%

Healthcare focus — no generalist consulting

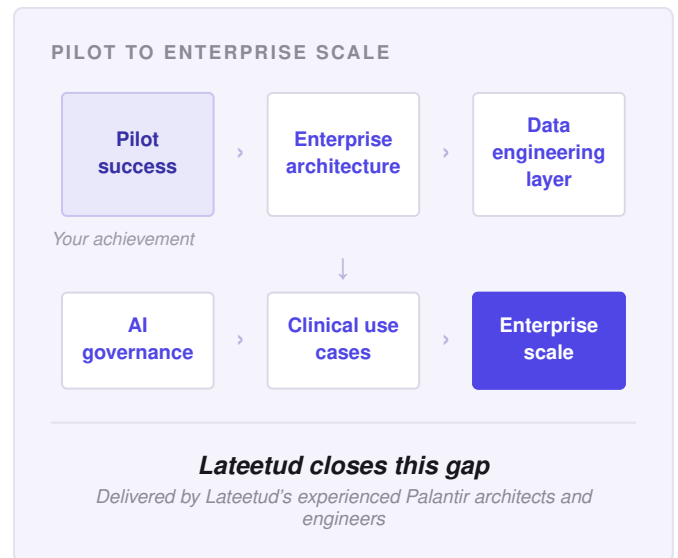

THE GAP

Your pilot worked. Scaling it requires expertise that is genuinely hard to find. Experienced **Palantir architects and engineers** are among the most sought-after specialists in healthcare technology. Lateetud gives healthcare organisations immediate access to that expertise — a team that has delivered **enterprise-scale Palantir transformations** across large hospital chains, without the cost or delay of building it yourself.

WHERE PILOTS STALL

- › Palantir talent left with the pilot team
- › Data layer built for one hospital — not fifty
- › Cross-EHR patient identity was never solved
- › **The AI worked. No one used it.**
- › Governance was never built — now the board is asking
- › Every new use case starts from zero

HOW WE CLOSE THE GAP

USE CASES DELIVERED IN PRODUCTION

Clinical operations

Staffing · patient flow · sepsis

Revenue cycle

Denials · RCM · payer analytics

Supply chain

Inventory · pharmacy · logistics

AI governance

Lineage · audit · monitoring

WHY IT MATTERS

100% healthcare. Every engagement builds your internal capability — so you never depend on us to keep the lights on.
